

Scouts MSC launch their new website : scouts.es

The Catholic Scout Movement in Spain has launched their new web 2.0 site, which incorporates new technologies, and focuses on multimedia content such as images and videos. scouts.es is a platform containing information about scout activities, but also includes news related to other issues linked to the movement's values, such as environment, equality, peace and social integration.

The site has the objective of offering a modern and accurate representation of the World of Scouting. The goal is to make a closer and more functional site to allow everyone to participate because: we can all be scouts.

[Scouts.es](http://scouts.es) is a tool that all the scouts in the movement can enjoy through their participation in games, interviews and reports.
